1. lopping while

```
GNU nano 5.4                                looping_while.sh *
#!/bin/bash
# Basic while loop
counter=1
while [ $counter -le 15 ]
do
echo $counter
((counter++))
done
```

2. lopping until

```
GNU nano 5.4                                looping_until.sh *
#!/bin/bash
# Basic until loop
counter=1
until [ $counter -gt 10 ]
do
echo $counter
((counter++))
done
```

3. lopping for

```
GNU nano 5.4                                looping_for.sh
#!/bin/bash
for value in {1..5}
do
echo $value
done
```

4. looping select

```
GNU nano 5.4                                looping_select.sh *
#!/bin/bash
clear
select buah in mangga anggur jeruk nanas
do
    case $buah in
        mangga|anggur)
            echo "Go to canteen"
            ;;
        jeruk|nanas)
            echo "Available at home"
            ;;
        none)
            break
            ;;
        *) echo "ERROR: Invalid selection"
            ;;
    esac
done
File Name to Write: looping_select.sh
